Dear Resident,

The Township of Parsippany Troy- Hills Administration, Engineering, Sewer and Health Departments in collaboration with the Morris County Division of Planning have developed a subsurface sewage disposal management program. This program allows the municipality the ability to protect the environment by educating property owners on the benefits of maintaining their sewage disposal system, as you are assured your septic system is operating efficiently, thus minimizing potentially expensive repairs.

Under Township Ordinance NO. 2018:09, residents are required to have their sewage disposal system registered with the Township along with proof of pumping. If the system does not need to be pumped a Septic System Inspection Report may be submitted verifying the system has been maintained and not in need of pumping. This will be required every three (3) years.

All of the necessary information is placed on the Township's Website:  
<http://parsippany.net/220/Human-Services>

Please look in "Documents" section under Human Services. Please have the initial license application submitted to the Health Department within 90 days of receipt of this notice.

We appreciate your patience and understanding during this initiative that protects the public's health and environment.

If you have any questions, please do not hesitate to call the health department at 973-263-7160.

Yours Truly,

Carlo DiLizia

Health Officer
