

Disposal of Syringes and Lancets Guidelines For Morris County

If you are a Morris County resident and have diabetes or another medical condition that makes you dependent upon injections -

PLEASE DO NOT THROW OUT YOUR USED SYRINGES!

They are **not accepted** at either of the Morris County Municipal Utilities Authority's transfer stations, at the Morris County Recycling Consolidation Center or at the Parsippany-Troy Hills Recycling Center because of their potentially hazardous nature.

Instead, you should take part in one of two Syringe Disposal Programs offered by local hospitals.

For more information about a program in your area, please contact either of the following:

- **St. Clare's Hospital (Dover & Denville Campuses): (973) 625-6779**
- **Morristown Memorial Hospital (Morristown): (973) 971-5271**
- **Chilton Memorial Hospital (Pompton Plains): (973) 831-5010**

By participating in a Safe Syringe Disposal Program, you are not only protecting the environment and keeping your home safe, you are considering the health and well being of the sanitation workers.
